

MAE 1001: Python “Power Chords”

Introduction to Mechanical and Aerospace Engineering

Course website: <https://gwu-mae1001.github.io/fall2025/>

Prof. Kartik Bulusu, CS Dept.

Graduate Teaching Assistant:

Preethi Siva Kumar (MAE Dept., MS student)

Learning Assistants:

Nathan Jannsen (Senior, MAE Dept.)

Olivia Falciani (Senior, MAE Dept.)

Shota Kakiuchi (Senior, MAE Dept.)

Tech support:

Rithik Gunuganti (CS Dept., MS student)

School of Engineering
& Applied Science

“Study hard what interests you the most in the most undisciplined, irreverent and original manner possible.”

– Richard Feynmann

What is a Power Chord?

- A power chord consists of just two notes: the root and the fifth.
- Commonly used in rock music for its strong, clear sound.

Representing Power Chords in Python

- Musical intervals can be modeled with **arrays/lists**, making it easy to calculate the root and fifth for any note.

Try to code using Thonny IDE that you all installed successfully!

```
import numpy as np
import sounddevice as sd

def play_power_chord(root_freq, duration=1.0, fs=44100):
    fifth_freq = root_freq * 2**(7/12)
    t = np.linspace(0, duration, int(fs*duration), endpoint=False)
    tone = np.sin(2*np.pi*root_freq*t) + np.sin(2*np.pi*fifth_freq*t)
    tone = tone / np.max(np.abs(tone)) # Normalize
    sd.play(tone, fs)
    sd.wait()

play_power_chord(82.41)
play_power_chord(110)
play_power_chord(146.83)
play_power_chord(196)
play_power_chord(246.94)
play_power_chord(329.63)
```

How did it sound?

Thonny-editor or integrated development environment (IDE)

Th

GET STARTED WITH RASPBERRY PI

What are the other options?

Anaconda python – IDEs:

- Spyder
- Jupyter Notebook
- Anaconda cloud

Source: Anaconda (IDE) <https://www.anaconda.com>

Google colab

It connects to powerful Google Cloud Platform runtimes and enables you to easily share your work and collaborate with others.

Youtube video shorts <https://youtube.com/shorts/7J3gU34j7Zk?feature=share>

Colaboratory ("Colab" for short)

- Data analysis and machine learning tool that allows you to
 - combine executable Python code and
 - rich text along with charts, images, HTML, LaTeX and
 - more into a single document stored in Google Drive.

Deepnote

Notebooks: a better way for teams to work with data

Jump right into Deepnote to explore data with Python and SQL, work together with your team, and share insights that lead to action — all from the comfort of your browser.
